About Us

T&D Supply Inc is a global player in electrical transmission solutions, renowned for delivering a selective catalogue of specialised components for the transmission, distribution, substation.

Our commitment to excellence is demonstrated through quality controls, adherence to standards, and an unwavering dedication to customer support at a very competitive pricing.

With locations covering CA and AZ,we prioritize relationships with our clients, providing end-to-end service from product manufacturing to meet customer print to post-purchase support, ensuring each project benefits from industry-leading tailored solutions.

Our Capabilities

Manufacturing & Engineering

Expert Engineering Team

- Our engineering team comprises professionals with decades of experience in substations, busbars and transmission lines.
- We offer component engineering, and supplier assessments to ensure clients receive unrivalled value, safety, and support.

Transmission & Distribution Solutions

- Our product range includes everything from compression dead ends and grading rings to customized fabrication, rigorously tested to ensure performance under harsh conditions.
- Each component is meticulously quality-checked and manufactured to integrate seamlessly within your infrastructure.

Distribution Hardware

- We offer an inventory of hardware and fittings, shackles, clevises, yoke plates, and more built for strength, durability, and compliance to key standards.
- Our inventory supports both new construction and retrofitting of existing networks.

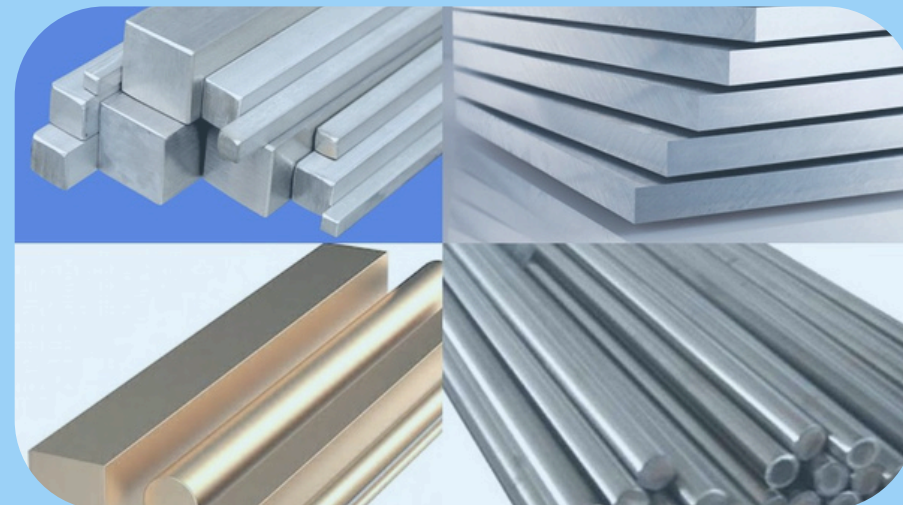

Our Capabilities

Manufacturing & Engineering

Metals Worked Upon

- Mild Steel
- Stainless Steel
- Copper
- Aluminium

Finishing Capabilities

- Zinc Plating
- Galvanizing(Outsourced)
- Powder Coating(Outsourced)

Fabrication

- MIG Welding
- ARC Welding
- TIG Welding
- Buffing
- Grinding
- Shot Blasting
- Machining (3/4/5 Axes)
